

UNIFLOW EMBEDDED APPLET FOR EPSON

uniFLOW Embedded Applet for EPSON

The uniFLOW Embedded Applet for EPSON provides a device-integrated solution enabling device locking, job release from a secure print queue, print, copy, fax accounting, and integration with the native scanning of EPSON devices. Managed by uniFLOW, EPSON multi-functional devices are easily integrated within your print fleet.

One driver for all – the uniFLOW Universal Driver

For submitting jobs to EPSON devices users are provided with one single driver – the uniFLOW Universal Driver. Its unique technology allows users to choose any network printer from which to release a job as print jobs will follow the user from device to device, regardless of model or manufacturer. The uniFLOW Universal Driver ensures correct output as requested which reduces user dissatisfaction with the printing process and saves costs by cutting waste.

Release to any device

All print jobs are stored in a user's personal secure queue until they are ready to release them at the printer of their choice. This can be any networked printer with the uniFLOW embedded applet installed. Users can select which of their print jobs to release from a list displayed directly on the device screen or from the uniFLOW app running on their smartphone or tablet. Document finishing options such as black & white/color printing, simplex/duplex and stapling/hole punching can be changed at the device. If users change their mind about certain settings they do not have to submit the job again but just make the changes while at the printer and release the job afterwards.

Cost savings, accounting and reporting

Any secure print jobs that have not been collected from the EPSON device within a predefined time are automatically deleted rather than sitting in a printer output tray. uniFLOW allows organizations to monitor savings made through improved printing practices e.g. deleting secure print jobs. With this information, better printing rules can be established to manage an entire device fleet or to create new rules and routing workflows that will decrease and optimize printing within the organization.

Multi-level cost center selection

uniFLOW allows organizations to assign costs within a multi-level cost center structure to charge back to the appropriate customer or project. Users can select the cost center to be charged from the screen displayed on the device control panel.

The 'Cost Center Selection' screen features a search bar and a path selection dropdown set to 'Top Level'. Below these is a table listing various cost centers with their names and descriptions.

	Name	Description
🔑	Accounting Department	Accounting Global
⬇️	IT Department	IT
🔑	Logistics	Logistics HQ
🔑	Logistics NA	Logistics USA
🔑	Marketing	Marketing HQ

Native scanning

Scanning documents is an important part of users' daily work. Documents can easily be scanned to yourself with only a few clicks after logging on at the device. Within seconds the scans become available at the users' desks for further editing or distribution.

Technical data

Core functionality

Device locking	✓
Print accounting	✓
Copy accounting	✓
Single-level cost center selection	✓
Multi-level cost center selection	✓

Secure print release

Automatic job release after authentication	✓
Individual job selection/ deletion on device	✓
Thumbnail preview	✗
Change finishing options before release	✓
Print shared jobs from archive	✗

Device authentication

PIN	✓
Username/ password	✓
Job code	✓
Card login (USB connection) via	
MiCard Multi V3	✓
MiCard PLUS C/PLUS Ci/PLUS BLE	✓
MiCard MultiTech4-NT-P/-PI/-P LEGIC ¹	✓
MiCard MultiTech4-NT-P/-PI BLE ¹	✓
Anonymous login	✗
Card registration on device	✓
Customizable login screen	✗
Device function restriction based on user login	✗

Native device scanning

Scan to myself	✓
Scan to folder	✓
Scan to mail	✗

Scanning and process automation

Personalized scan workflows	✗
Advanced document processing	✗
Scan to cloud-based destinations	✗
Scan to DMS/ECM systems	✗
Scan to CSI-based destinations	✗

Secure print job submission

Submit via uniFLOW Universal Driver	✓
Driverless printing from OS-X® using AirPrint®	✓
Submit via email/ web browser	✓
Submit via native uniFLOW app	✓
Submit via Apple AirPrint®	✓
Submit via Google Cloud Print™	✓

¹ Recommended card readers to be used with EPSON devices/Since the use of these readers requires support from the NT-ware Project Team, a pre-sales (PS) request must be raised via the NT-ware Customer Portal. All MiCard MultiTech4-NT card readers to be used on EPSON machines need to be ordered via NT-ware.

THE EMBEDDED APPLET ALLOWS FOR AN
EASY INTEGRATION OF THESE DEVICES
INTO YOUR MANAGED FLEET AND
TO PROFIT FROM UNIFLOW'S **STRONG
MULTI-VENDOR SUPPORT.**

Increase document security

To prevent unauthorized use of devices and to keep valuable and confidential information safe, uniFLOW requires users to identify themselves at a device. This keeps confidential documents out of the wrong hands.

Control and reduce costs

Using the built-in reporting system, organizations can track and assess printing usage, allowing internal costs to be charged back correctly and current usage audited.

Improve employee productivity

All print jobs, regardless of how they are submitted to uniFLOW, appear in the user's personal secure print queue and can be released from any device, regardless of model or manufacturer i.e. users can print securely using any connected device.

Help save the environment

uniFLOW can provide the analysis to help implement an environmental printing strategy, saving valuable resources and improving environmental performance.
