

Release Notes

uniFLOW 2022v2

Confidentiality: Internal + Partner (R3P)

1 About this document

This document contains the release notes for the uniFLOW release(s) listed below. Clicking one of the links will take you to the page containing the release notes for the corresponding release.

- uniFLOW 2022v2 (see [uniFLOW 2022v2 - Release Notes](#) on page 3)

User Manual

The English uniFLOW User Manual (web help) will always reflect the latest documentation changes.

The Issue key column

For each issue covered in this document, the first column of the release notes table, labeled *Issue key*, contains a number that refers to an issue in NT-ware's internal issue tracking system. When contacting NT-ware and referring to a release note, always include its number shown in the *ITS Number* column.

The Severity levels

The *Severity* column classifies the severity of the bugs or defects fixed with the release. This classification only applies to the *Bug*, *Defect (QA)*, and *Security* issue types.

Severity level	Description
A	Urgent severity If the problem happens, the system is not usable anymore, e.g., due to a security issue, deadlock, kernel crash/hang, loss of communication, etc.
B	High severity If the problem happens, major functionality is lost, e.g., jobs are not visible on all devices but can still be released on others.
C	Medium severity If the problem happens, some minor functionality is lost. A workaround might exist, e.g., finishing options are not saved when printing with the uniFLOW Universal Driver but can still be set at the device.
D	Low severity The problem has little to no impact on the availability of the system, e.g., cosmetic errors, typos, etc. are visible, but do not affect functionality.

2 uniFLOW 2022v2 - Release Notes

The table below lists all changes and updates implemented with this release of uniFLOW. The issue resolutions and new features are ordered alphabetically by their issue type.

ITS-No	Issue Type	Component	Severity	Release Notes
MOM-24797	Improvement	Large Format Printing		Added support for extended interface of PlotWave devices.
MOM-24779	Improvement	Installer		Replaced the terms <i>master</i> and <i>slave</i> used in the uniFLOW installer with more appropriate terms <i>primary</i> and <i>subordinate</i> .
MOM-24389	Improvement			Updated Foxit Print Manager component.
MOM-24900	Fixed issue (QA)	Installer	D	Obsolete files, folders, and registry items are now removed during uniFLOW SmartClient for Windows uninstallation.
MOM-24838	Fixed issue (QA)	License System	C	The SMB Device License for Epson can now be activated more than once.
MOM-19933	Fixed issue (QA)	Device Information File (DIF), uniFLOW Universal Driver	A	An additional page gets added in case duplex is detected and an odd amount of pages has been processed.
MOM-24972	Fixed issue	License System	B	uniFLOW Release Stations configured for a hybrid RPS now display the Subscriptions tab correctly once they have been synchronized to uniFLOW Online.
MOM-24913	Fixed issue		C	uniFLOW Server now forwards user information received from uniFLOW Online to its connected RPS correctly.
MOM-24891	Fixed issue		B	An additional print spooler restart during the uniFLOW SmartClient for Windows upgrade procedure now prevents potential workflow execution issues when switching from single-instance mode to multi-instance mode (or vice-versa) during the uniFLOW SmartClient for Windows application upgrade.
MOM-24681	Fixed issue	uniFLOW Client for Mac	B	The uniFLOW Client for Mac now uses settings from preference pane.
MOM-20492	Security	Installer, Update Wizard	C	Removed installation of PHP from uniFLOW server installation.
