This document contains the release notes for the uniFLOW 2020 LTS release(s) listed below. Clicking one of the links will take you to the page containing the release notes for the corresponding release.

  ▪ uniFLOW 2020 LTS SR11 Release Notes (on page 3)

User Manual

The English uniFLOW User Manual (web help) will always reflect the latest documentation changes.

The Issue key column

For each issue covered in this document, the first column of the release notes table, labeled *Issue key*, contains a number that refers to an issue in NT-ware's internal issue tracking system. When contacting NT-ware and referring to a release note, always include its number shown in the *ITS Number* column.

The Severity levels

The *Severity* column classifies the severity of the bugs or defects fixed with the release. This classification only applies to the *Bug*, *Defect (QA)*, and *Security* issue types.

Severity level	Description
A	Urgent severity If the problem happens, the system is not usable anymore, e.g., due to a security issue, deadlock, kernel crash/hang, loss of communication, etc.
B	High severity If the problem happens, major functionality is lost, e.g,. jobs are not visible on all devices but can still be released on others.
C	Medium severity If the problem happens, some minor functionality is lost. A workaround might exist, e.g., finishing options are not saved when printing with the uniFLOW Universal Driver but can still be set at the device.
D	Low severity The problem has little to no impact on the availability of the system, e.g., cosmetic errors, typos, etc. are visible, but do not affect functionality.

2   uniFLOW 2020 LTS SR11 Release Notes

The table below lists all changes and updates implemented with this release of uniFLOW. The issue resolutions and new features are ordered alphabetically by their issue type.

Issue key	Issue type	Component	Severity	Release notes
MOM-21822	Security		B	Removed obsolete files from uniFLOW Server Web as a security fix. A security advisory document to be published on https://www.uniflow.global/en/security/security-and-maintenance/ will disclose more details.
MOM-18256	Security	uniFLOW Remote Print Server	B	Applied a security fix to the uniFLOW RPS. A security advisory document to be published on https://www.uniflow.global/en/security/security-and-maintenance/ will disclose more details.
