

Release Notes

uniFLOW 2022v3

1 About this document

This document contains the release notes for the uniFLOW release(s) listed below. Clicking one of the links will take you to the page containing the release notes for the corresponding release.

- uniFLOW 2022v3 (see [uniFLOW 2022v3 - Release Notes](#) on page 3)

User Manual

The English uniFLOW User Manual (web help) will always reflect the latest documentation changes.

The Issue key column

For each issue covered in this document, the first column of the release notes table, labeled *Issue key*, contains a number that refers to an issue in NT-ware's internal issue tracking system. When contacting NT-ware and referring to a release note, always include its number shown in the *ITS Number* column.

The Severity levels

The *Severity* column classifies the severity of the bugs or defects fixed with the release. This classification only applies to the *Bug*, *Defect (QA)*, and *Security* issue types.

Severity level	Description
A	Urgent severity If the problem happens, the system is not usable anymore, e.g., due to a security issue, deadlock, kernel crash/hang, loss of communication, etc.
B	High severity If the problem happens, major functionality is lost, e.g., jobs are not visible on all devices but can still be released on others.
C	Medium severity If the problem happens, some minor functionality is lost. A workaround might exist, e.g., finishing options are not saved when printing with the uniFLOW Universal Driver but can still be set at the device.
D	Low severity The problem has little to no impact on the availability of the system, e.g., cosmetic errors, typos, etc. are visible, but do not affect functionality.

2 uniFLOW 2022v3 - Release Notes

The table below lists all changes and updates implemented with this release of uniFLOW. The issue resolutions and new features are ordered alphabetically by their issue type.

ITS-No	Issue Type	Component	Severity	Release Notes
MOM-24771	Improvement			Added Therefore Online/2019 support to uniFLOW Server.
MOM-24489	Improvement	Installer		Improved the uniFLOW Server, RPS, SPS, and Desktop Scan Client installers so that they will not install the included version of the Microsoft Visual C++ 2015 Redistributable Package if version v14.27.29016.00 (or later) of the package is found on the computer, thus avoiding the necessity to reboot after installation.
MOM-25063	Fixed issue		D	Made sure the MomPdfSplitter.exe executable is signed.
MOM-24996	Fixed issue		B	Fixed a bug that could cause a memory leak while the global configuration was encrypted and written to a file.
MOM-24978	Fixed issue	MEAP Behaviour	B	Fixed a bug due to which the device agents of a dual-registered device were not started correctly on a uniFLOW Server.
MOM-24947	Fixed issue	Device Agents	B	Added missing mechanism to update the OAuth Refresh token.
MOM-24806	Fixed issue	License System	C	Changing the uniFLOW Server's name does not remove the subscription on a uniFLOW Hybrid server anymore.
MOM-23924	Fixed issue	uniFLOW Admin Service	B	The Start and Stop buttons on the admin service website now work in browsers other than Microsoft Internet Explorer.
MOM-17862	Fixed issue	Workflow Engine & Elements		Fixed a bug due to which Non-UD workflow jobs were not removed correctly in case of Print & Keep.
MOM-25014	Security	Server Web	B	Security fixes
